

# King County, WA Housing Data Analysis

---

Lauren Petrillo

# Questions to Ask

What features of a house are linearly related to price?

What are the most important factors when determining price of a house?

Does the location or internal features of a house affect the price?

# Housing Dataset

- The data given is from King County, WA
- The dataset contains features about: bedrooms, bathrooms, square footage, location, view, waterfront, number of floors, zipcodes
- Our goal is to build a model to predict the price sale in order to come up with actionable insights

# Filters for Our Target Houses

- $\$78,000 \geq \text{Price} \leq \$5,570,000$
- $\text{Bedrooms} < 10$
- $\text{Bathrooms} < 4$
- $\text{Floors} < 3$
- $370 \text{ sqft} \geq \text{Living} \leq 5990 \text{ sqft}$

# Top Features

- Zipcode:
  - 98112, 98039, & 98004
- Square Foot Living
- Grade
- Condition
- View

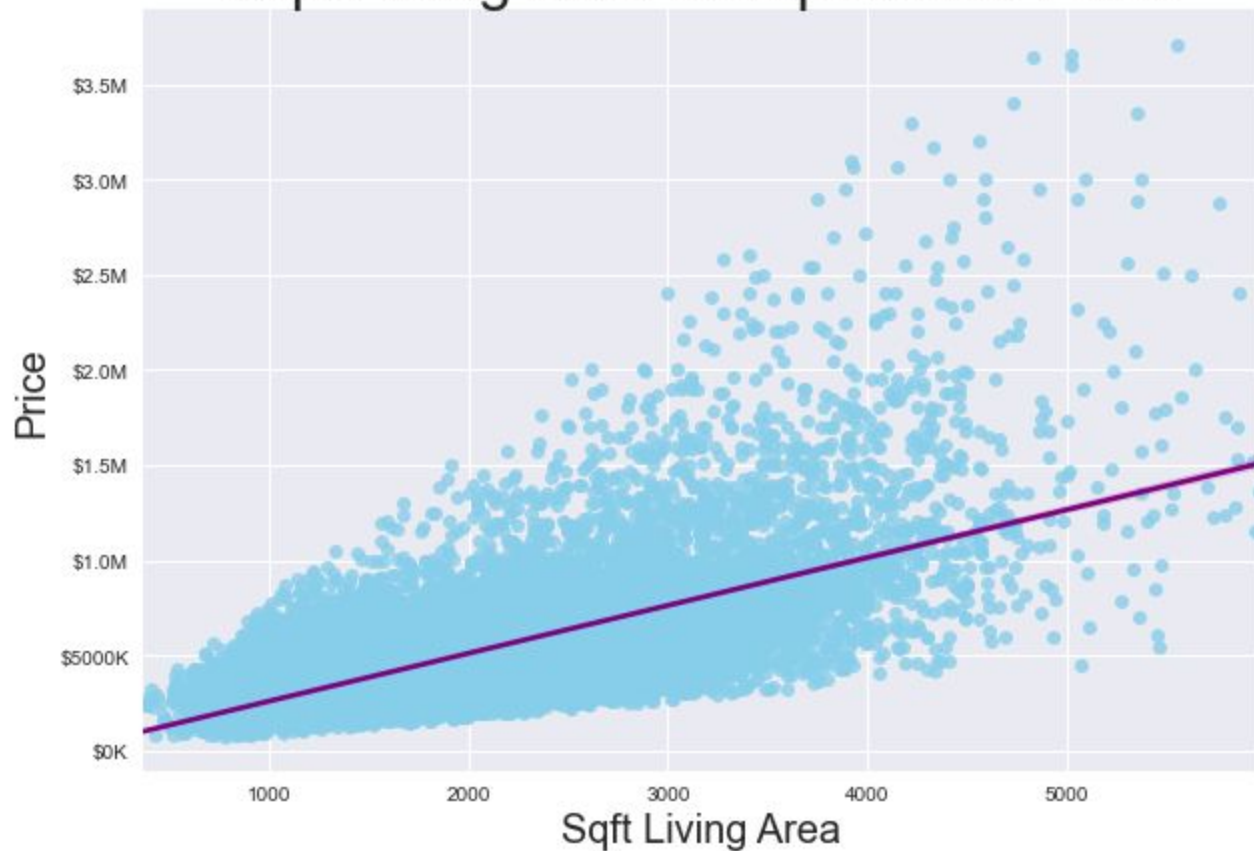

# Top Findings

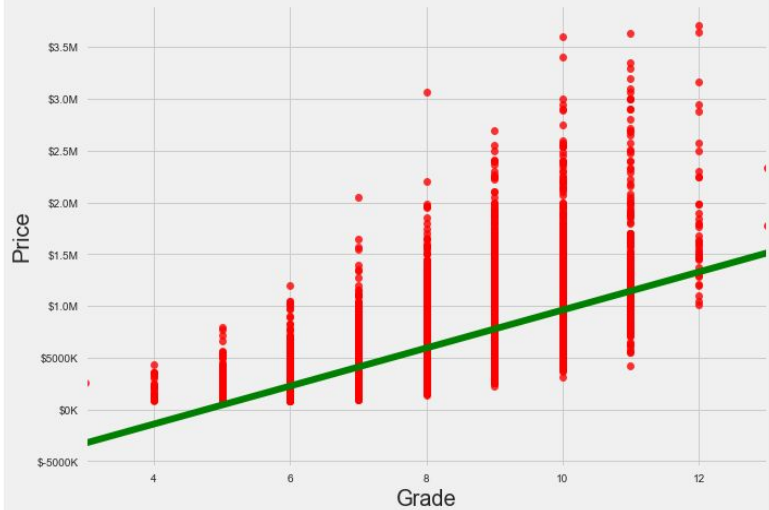

- Zipcode 98039
  - Coef = 1.27, price will increase by 12.7%
- Sqft Living
  - Coef = .17, price will increase by 1.7% per 100 sqft
- Highest Grade
  - Coef = .44, price will increase by 4.4%

## Sqft Living Area Compared to Price

### Grade based on Price

### Grade based on Sqft Living Area

# Conclusions

The most important features to focus on are grade and square foot living

Location (geographic features) is also important

# Recommendations

1. Renovate to increase square footage.
2. Target certain areas to buy and resell.
3. Invest in upgrades to improve quality.

# Future Work

1. Gather data from different school districts in KC to see if there is a relationship with prices of a house and the quality of schools.
1. Look at location to see how much of a factor it plays into the price of a house (lat/long).
2. Get before/after stats on renovated houses to see the frequency houses are being renovated and if it has an effect on prices.

# Thank You!
